Papas Collection

design studioPANG

An effective dialogue between design, technology and comfort gives rise to a Lounge Chair that offers a strong formal character. Sinuous and enveloping, but also delicate and with attention to details, the chair consists of two generous padded shells joined together with a little back connection that ideally maintains the overlying backrest suspended in space.

The metal base is slender, light and retraces with a 16mm tube the perimeter of the seat, supporting it and highlighting its design.

Dining Chair

An impressive stacking chair where design, workmanship and industrial process live together, giving life to a versatile family of products.

Dining Chair
Sled Edition
Armrest

16 Edition

The same chair is also available with a different metal frame, entirely made with a 16mm tube. With or without armrests, the chair keep its high stacking attitude and could be finished in various plywood essence or upholstered.

Deluxe Edition

A special edition, perfectly suitable for exclusive environments where the search for comfort and style is kind of prerogative. A 16mm tube frame, leather or fabric padded chair, with a cosy soft upholstered pad on the armrests which make this version unique indeed.

The chair is still easily stackable.
