# Storm Collection

design studioPANG

Storm is a neat system of tables which reveals a high-level versatility as well as a really minimal and essential looking. The 4 legs could be totally made of steel or steel combined to solid wood, offering a wide range of finishes solutions. The top of the table is made of HPL, ceramic or wood. It is suitable for any kind of environment: a quiet design makes it perfect for home areas. Its functionality and strongness make it particularly suitable mostly for working spaces.

The collection offers fundamentally two base versions: in the Storm-A solution the lateral edge of the top is 40cm distant from the legs, while in the Storm-B solution that distance is 8cm.

## Storm A-260

Wood Legs  
White Hpl Top  
8 seats

## Storm A-200

Wood Legs  
White Hpl Top  
6 seats

**Storm A-300**
